- **Upper Middle Quartile**
  - Female: 9%
  - Male: 91%

- **Upper Quartile**
  - Female: 8%
  - Male: 92%

**Commentary:**

- TCUK mean Gender Pay Gap is in line with the industry comparator
- STEM issues continue to drive a lower representation of women in well-populated, senior, incentivised roles in the industry, however, the organisation continues to be involved in a number of initiatives to support the progression of women including:
  - Delivering Managing Inclusion training to senior management team and all direct reports throughout 2018 and 2019
  - Continue to engage with STEMettes to provide insight and opportunity in the business to young women studying and looking to pursue a career in STEM activities.
  - Continue our strong partnership with SkillFRIDGE UK, including sponsorship of the National SkillFRIDGE Competition, accessible to all apprentices and with a goal for 2018 of creating a more inclusive platform to encourage diversity in the competition.
  - Reviewing all policies to support the attraction and development of women
